New York Central was also very weak. To increase the difficulties of the approaching settlement, there are ugly numors of failures in the mining line. One firm had to suspend payments. The London journals all raifor editorially to the suspension, but, as usual, they show very little knowledge or discrimination in their comments. All American railways are thrown by them into one pot, and the best lines are judged from the point of view of the defaulting one. I have seen sureral losting Equilibit, as well as Anglo-American bankers, who say that they do not expect any serious trouble. They consider the tast of the Philadelphia and Reading flailway quite exceptional, because the company has undertaken a line of business which did not come within the scope of railway management. It is acknowledged, however, by the best judges in such matters, that American railway credit had received a severe shock in Europe, and the failure is not likely to be soon forgotion.
